

ALAN GOMEZ

PRODUCT DESIGNER & UX ENGINEER

alangomez.design@gmail.com | linkedin.com/in/gomezalan08 | behance.net/alangomez39 | alan-gomez.tech

PROFESSIONAL SUMMARY

Product Designer and UX Engineer blending an advanced academic foundation in Computer Engineering with an obsessive, strategic drive for user experience and business alignment. Specialized in operating at the precise intersection of Figma and frontend development, accelerating production lifecycles through AI-augmented workflows, and guaranteeing frictionless technical transfers to production using component-driven UI architectures and robust documentation.

PROFESSIONAL EXPERIENCE

Freelance Product Designer

2024 — Present

Independent Consulting

- **Consulting & UX Research:** Led discovery sessions and user research with independent clients to define end-to-end (0 to 1) product strategies, ensuring business model viability and user alignment.
- **UI Engineering & AI Workflows:** Architected robust Design Systems leveraging advanced Figma features (Auto Layout, variables, variants). Integrated AI tools (Claude, Figma Make) to drastically accelerate UI generation and rapid prototyping cycles.
- **Frontend Development & Handoff:** Translated high-fidelity mockups into production-ready Single Page Applications (SPAs) using React and Tailwind CSS. Implemented Storybook for UI component and API documentation, eliminating developer friction.
- **Brand Identity & UX Copywriting:** Crafted comprehensive brand visual systems (logos, optimized App Store/Google Play graphic assets) and strategic copywriting focused on Conversion Rate Optimization (CRO).

UX Lead

2025 — 2026

Nuxio Software

- **Team Leadership & Multi-Project Management:** Directed 2 junior designers and concurrently managed up to 5 comprehensive product development lifecycles using Agile frameworks and Sprint structures.
- **Critical Business Impact:** Led and executed the rapid, end-to-end turnaround redesign of the "Nuxio Rescue" industrial B2B platform under severe time constraints, directly preventing client churn and securing a key corporate account.
- **Cross-Functional Collaboration:** Facilitated daily stand-ups and weekly alignment sessions with software engineering teams to cross-examine technical feasibility and streamline design-to-development handoffs.
- **Stakeholder Management:** Conducted direct discovery and high-fidelity presentation sessions with corporate clients, translating complex technical and commercial requirements into clear product roadmaps.

EDUCATION

Computer Engineering (In Progress)2022 — Present

National University of Hurlingham (UNAHUR)

- Rigorous training in algorithmic foundations, data structures, logical system design, and software architecture.

Frontend Development & UX/UI Certifications2023 — 2026

CoderHouse

- **React Front-End Certification (2026):** Scalable SPA architecture, advanced hooks, and state management.
- **JavaScript Certification (2026):** Advanced DOM manipulation, asynchronous logic, and modern ES6+ standards.
- **Web Development Certification (2025):** HTML5/CSS3 layout standards, advanced layouts (Grid/Flexbox), and responsive design.
- **UX/UI Design Certification (2023):** User-centered design, qualitative/quantitative research, and B2B interface prototyping.

CORE SKILLS & METHODOLOGIES

Design / UI:	Figma (Auto Layout, Variables, Advanced Prototyping), Design Systems, UX Research, Material Design 3, Wireframing, Adobe Photoshop, Adobe Illustrator.
Frontend Development:	React, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3 (Grid/Flexbox), Storybook, Firebase integration basics.
AI & Prod Workflows:	Claude, Figma Make, AI-augmented design workflows, UX Copywriting, Conversion Rate Optimization (CRO).
Methodologies:	Agile, Sprints, Scrum, Multi-project Management, Technical Mentoring, Design Handoff Processes.
